Press Release
Spring Summer 2010

Helene

With her eye for detail and feel for quality Monika Lubkowska-Jonas, Designer & Creative Director, has created a distinctive and remarkable collection for 2010.

Lucie

Create a vintage look with LSA's new Lucie collection. Elements for dining and for the dressing table are available in subtle heather, mocha and peacock, as well as in clear glass, the fine shapes and delicately dimpled texture adding an elegant old-fashioned feel.

Mia

Have you ever wondered how the jars and bottles collected for recycling are used? For LSA they are melted down then mouth-blown by artisans to create the new Mia collection.

To maximize sustainability, recycled paper and card are used for the packaging and both the glass and the packaging are recyclable.

Set a table with wine glasses and tumblers, serve salad and wine using the bowls and carafes – LSA's 100% recycled glass is made to enjoy.

Mimi

Pale candy colours recalling palettes used in the 1950s are used in the Mimi collection of tumblers, glasses and cute single bloom vases.

The lemon, rose, apple and lavender of the glasses coordinate perfectly with the Tutti mugs of the same colours to create the perfect setting for Summer dining.

Tutti

Featured in retro candy colours, bold tropicals and muted neutrals the Tutti mug collection can be mixed and matched to suit numerous colour themes and styles.

Each of the 13 mugs is completed with a large dot placed in the inside of each piece and a single mug, decorated in a mosaic of all 13 colours, completes the collection.

Coro

Building on this collection's significant success last year, key new lines (a dessert dish, hi-ball and tea light holder) have been introduced for 2010. All items are presented in gift boxes and feature price points that mark the playful Coro as excellent value.

Light

Light is an extensive collection of classic handmade candleholders designed to enhance your home and garden.

Each piece within the range is gift boxed and supplied with its corresponding candle.

Flower

LSA's new Flower collection presents classic handmade vases designed for use throughout the home.

Suiting a wide variety of cut flowers and foliage, these vases can be used for all seasons on both formal and informal occasions.

Each piece is presented in a gift box showing a full colour photograph of a final arrangement.

Omega

Omega defines modernity with the pure spherical shape just slightly extended to create a simple foot.

Tumblers and goblets, a heavy decanter and vases are featured in this collection which is available in pure clear glass, as well as teal and grape cased glass.

This handmade collection is wrapped in LSA tissue and presented in a gift box.

The hand-applied and embossed cord of glass is a centuries-old technique, brought up to date in the Yvette collection.

Wrapped in LSA tissue and gift boxed, this collection is ideal for weddings and other gift giving occasions.
